SUBJECT: Economic Policy Council Agenda

We are in the process of developing the agenda of the Economic Policy Council for the next six months. I would appreciate your providing a list of those domestic and international economic policy issues you foresee the Council needing to consider. This list should include those issues on which the Administration will have to develop a position, as well as policy initiatives the Administration may wish to consider. This list should include a one paragraph description of the issue and any events that will affect when we need to review it.

I would appreciate it if your list of suggested issues could be submitted to my office by close of business on Friday, November 22, 1985.

Thank you very much for your help.
